

Alexej Platizin

QA Engeneering "Testing", CT-(Game) "Game Testing"

Kaltenkirchen, Deutschland +4915227 791417

alpatin6@gmail.com

Summary

As a Software Engineer with a background in craftsmanship, I bring a unique blend of discipline and problem-solving acumen to the technology sector. My expertise lies in Python, Java, and JavaScript, and I specialize in constructing scalable applications utilizing cutting-edge methodologies. Currently, I am honing my skills in QA Engineering and am actively pursuing a position as a Testing & Developer in Test. My experience spans Jenkins in Continuous Delivery and Continuous Integration, Azure DevOps, and Test Management, covering the full spectrum of the Software Testing Life Cycle (STLC). I am also proficient in Dockers, SQL, and Framework with Jira, including both Kanban and Scrum methodologies. I am dedicated to delivering superior solutions and have successfully completed the CT-(Game) "Game Testing" certification.

Education

Masterschool	Apr 2025 - Present
Software Engineering	Training Program
- Acquires hands-on experience through an immersive program, developing full-stack applications using JavaScript, React, Node.js, and SQL. - Applies software engineering principles such as object-oriented programming (OOP), test-driven development (TDD), and version control (Git, GitHub) in real-world projects. - Builds and deploys scalable applications using RESTful APIs, cloud services, and CI/CD pipelines, improving system performance and maintainability.
